

SMART EMISSION CONTROL

EMISSION CALCULATION AND REPORTING APP

- Application developed for entering, calculating and reporting emissions
- Originally created to support GHG-protocol
- Qualified partner solution by Microsoft: based on Power Platform technologies
- Fully customizable to Your company's brand
- Localized for Finnish, English and Swedish, but can be extended to any language
- Enables users to enter emissions by different sources and manage emission factors
- Application is based on Power Apps reporting based on Power BI
- Makes emission collection easier, calculates emissions to tCO2e automatically and helps to follow-up and achieve Your company's sustainability targets

PACKAGED IMPLEMENTATION

Free app: pay only for customization

Deployment duration: 1-2 weeks
