

## SAP DATA TO AZURE KICKSTART

### INTRODUCTORY WORKSHOP + ARCHITECTURE/DEPLOYMENT PLAN

**Introduction workshop** for exploring options of **Integrating SAP Data into Azure-based Data Platform**

Many organizations face challenges when integrating SAP (ECC/S/4HANA) data into modern data platforms on Azure. Can we use Azure Data Factory HANA? Should we use third-party tools like Aecorsoft? Should we ingest data from SAP tables, extractors or via functional modules? Is SAP BW necessary?

During the workshop **we will provide answer to all of these and more!**

As a result, participants will gain a clear understanding on relevant options to integrate SAP data into Azure based data platform, understand the pros and cons in their unique environment, and develop an initial architecture and deployment plan.

2000 € fixed price  
(without customization)

Assessment duration: 2 weeks  
(without customization)

All organizations already using SAP ERP system and planning to integrate their data into the Azure platform

End deliverable: gain a clear understanding on relevant options to integrate SAP data into Azure based data platform
