

## ISLET AI CORE

### PACKAGED AI ASSISTANT SOLUTION

#### Key features:

- Runs directly in Teams, as the customer's **own application**
- Messages and conversation history are stored securely and according to the customer's **own policy**
- Based on **latest GPT-4o AI model**, which is changeable easily and quickly
- Document and image analysis & Web search and browsing
- **Expendable** to various AI capabilities and use cases (e.g. RAG)

#### Benefits:

- **Security & Privacy:** it runs in the customer's own Azure environment, data is not used for training language models or developing Azure services, EU AI Act compliant
- **Streamlines work** by providing automated responses and analyzing documents
- **Easy to use and deploy**, perfect secure and cost-efficient alternative to e.g. ChatGPT

Can be **expanded** with advanced **capabilities** such as access to internal materials and asking questions related to internal data, use your own tone, set personalized alerts, update data directly or request process automation.
