SMART FINANCE

powered by SAP S/4HANA Cloud Public Edition

Financial operations

- Support collaborative and automated finance operations
- Improve working capital and financial health with real-time data to assess customer credit risk, streamline billing, and resolve disputes
- Prioritize collections to reduce days sales outstanding

Accounting and financial close

- Simplify accounting and financial close processes
- Combine financial and management accounting and profitability data into a single universal journal
- Manage groupwide accounting and close your books in real time with less effort

ISLET

SAP[®] Qualified
Partner-Packaged Solution

Cost management and profitability

- Improve profitability and cost with comprehensive analytics
- Assess profit and margin contribution with real-time reporting, predictive analytics, and integrated business planning
- Manage profitability and analyze customer experience strategies

Billing and invoice processing

- Enable various revenue models
- Deliver consolidated invoices, manage credit scoring, and resolve disputes with a complete view of the customer
- Manage both customer and supplier invoices with automated processes

Revenue accounting and reporting

- Comply with new statutory regulations for revenue recognition, such as IFRS 15, while supporting existing requirements
- Handle orders, invoices, and events from multiple systems
- Gain flexibility by decoupling revenue recognition rules from order entry and billing systems

Treasury management

- Improve treasury and financial risk processes
- Optimize straight-through processing with real-time analysis, audit trails, and compliance reporting
- Predict cash flow accurately, manage liquidity efficiently, and mitigate risk proactively
- Integrated bank communication
